"Come get your education in SPEED!"

2010 SEASON

THE FAST TRACK FLEET

Our cars are NASCAR/ARCA-style stock cars, some of which have competed on the circuit. The fleet includes Chevrolet, Ford & Dodge race cars. Designed for the safety of our participants, these vehicles are capable of speeds of up to 165 miles per hour, dependent on track conditions & size, as well as students' skill levels.

SAFETY EQUIPMENT

FAST TRACK offers the best in safety equipment. *IMPACT!* helmets, driving suits, safety harnesses, as well as HANS devices are provided during each course.

COURSE DESCRIPTIONS

Three Day Basic Oval Course

DAY ONE – Your experience begins with classroom instruction addressing the basics of driving a stock car at high speed, pit road safety, flag & hand signals, & general information. Afterwards, walk the race track with instructors who will describe the best & safest line. The drive the track in passenger cars with an instructor. Next, students will drive in a specially equipped NASCAR/ARCA-style race car at a slow, safe speed with an instructor to guide the student through laps. After a lunch break, students practice their skills driving alone under the supervision of the FAST TRACK instructors.

DAY TWO – Students will resume working on race maneuvers for about three hours, continuing to fine tune their skills. After a lunch break, students will practice nose-to-tail, side-by-side maneuvers designed to simulate actual racing conditions.

DAY THREE – Students will learn the basics of stock car setup, stagger, tire pressure, shocks, springs, etc. in our chassis class (class may be in afternoon) to better understand the handling characteristics of a stock car. After a lunch break, students will resume practice under the supervision of their instructors. Practice consists of a four car nose-to-tail, side-by-side group maneuver, designed to simulate actual racing conditions.

One Day Basic Oval Course

This course is Day One of the Three Day Basic Oval Course & offers all basic information you need to solo a NASCAR/ARCA-style stock car.

Thunder Course

Lasting approximately two hours, class begins with a safety orientation in a classroom setting & a fitting for helmets & driving suits. Students will drive stock cars for a 10-12 lap segment (depending on the track), following a lead car driven by a FAST TRACK instructor. One segment not enough? Try a two segment Thunder Course!

Three Lap Race Car Ride

Enjoy three laps around the race track in one of our two-seat NASCAR/ARCA-style stock cars with a FAST TRACK instructor driving for a thrill ride you'll never forget!

COURSE	TRACK	LAPS	PRICE
